BRICS: The Biggest Threat To American Economic Globalism?

NOVEMBER 10, 2014 / CONSCIOUSAWARENESSFORALL / EDIT

The idea of an official trilateral cooperation between the global super-powers of Russia, India ann China was **first publicly aired** in December of 1998 by then-Russian Prime Minister ***YEVGENY PRIMAKOV*** during a state-sponsored visit to India. From 2003 to 2005, Foreign Ministers from the three nations held their first trilateral meetings alongside the UN's General Assembly.

Fast forward to 2011. Russia, India and China have now added Brazil and South Africa to the mix to form **BRICS**, a political and economic super co-op comprised of roughly **40%** of the global population and **20%** of the world's **GDP** (Gross Domestic Product). Together, they make up roughly **18%** of the entire global economy, with an estimated **$4 TRILLION USD** in monetary reserves amongst them.

Together, the nations of BRICS work to achieve goals such as the reformation of the global monetary system, combating negative climate change, securing national borders, combating terrorism, curbing drug trafficking, defusing hotbeds of global and national tensions, consolidating democracy in international relations, strengthening the global voice of emerging economies and developing stronger nations; ALL goals with which the U.S.-Israeli zionist machine has ALSO chosen to task itself.

The nations of BRICS are also taking on western economic globalism by **forming** their own iteration of a world bank. **Rivaling** the West's **IMF** (International Monetary Fund), the BRICS bank will have over **$150 BILLION** USD in currency reserves, rendering it *MORE* than capable of lending capital to emerging nations, as well as those experiencing economic hardship. By comparison, the IMF has roughly **$370 BILLION** USD in their currency reserve pool. This new economic super co-op can finally **help to build up** nations and economies that have been forgotten or targeted by the **western zionist steamroller**.

And BRICS is not the only economic co-op on the block that has the potential to rival the IMF. **MINT** (made up of Mexico, Indonesia, Nigeria and Turkey) and **The Next Eleven** (comprised of Bangladesh, Egypt, Indonesia, Iran, Mexico, Nigeria, Pakistan, The Philippines, Turkey, South Korea and Vietnam) are also making headway in the global economic race.
